## About This Game

Designed solely for virtual reality (VR), Fractal brings first-person real-time combat to beautiful stylized VR vistas. Enter a dazzling dimension where color is the lifeblood of all beings. Wielding a mysterious brush, you are granted the power to reshape the world and fate of its denizens. Experience intuitive fast-paced combat inspired by the simple motion of painting. Master the rhythmic flows of battles and vanquish foes to evolve your powers based on your playstyle. The world of Fractal awaits, how will you forge its destiny?

I initially got this game because I was impressed by the sleek visuals from the trailer. The gameplay is sort of like tilt brush meets action game where you time enemy attacks and paint to block and counter them. Overall a lot of potential, but have to see if the developers can excute all the planned features.. slow  
repetitive  
boring

cool artwork, but...  
yeah i wouldnt recommend it  
its basically like BROOKHAVEN EXPERIMENT for 3 year olds  
colored squares float towards you from all sides, choose the matching color to paint them so they explode  
thats it...
